Drive scale: The Sustainable Rice Platform (SRP) network comprises 100 global public, private, and civil society organizations. We foster multi-stakeholder partnerships to deliver proven solutions in the global rice sector. We scale through establishing SRP National Chapters to secure commitment at country-level and drive durable public-private-people partnerships.

Build capacity: With the SRP Standard for Sustainable Rice Cultivation, we enable farmers to adopt practicable and sustainable rice farming techniques. Individual progress is tracked to ensure farmers maintain positive outcomes.

Incentivize change: SRP Projects offer an integrated and customized approach to ensure appropriate timing and suitable smallholder incentives. We feature the positive outcomes for smallholders and communities to promote a shift to climate-smart and sustainable practices.

Facilitate market linkages: Through the SRP Assurance Scheme, we enable participating farmer groups to connect with buyers seeking sustainably produced rice with value chain transparency. Retailers can make credible public claims and create market differentiation through sustainable rice, inspiring consumer choices and behaviour.

Deliver tangible impacts: Aligned with the UN Sustainable Development Goals, the SRP Performance Indicators assist in measuring the economic, environmental, and social impacts of sustainable best practices in rice production.

100+ institutions engaged
25 projects registered
21 countries across 5 continents
10% increase in farmers’ income
20% savings in water use
50% reduction in GHG emissions
Our Goals

The Sustainable Rice Platform (SRP) is a global multi-stakeholder alliance to promote resource-use efficiency and climate change resilience in rice systems – both on-farm and throughout value chains.

We work globally to:
- Improve smallholder livelihoods in developing countries;
- Reduce the freshwater & carbon footprint of rice production; and
- Offer responsibly cultivated rice in the global market.

Within the next 10 years, we aim to reach 10 million rice farmers who are the first line of defense against global food insecurity and further environmental, economic and social degradation.

Get Involved

Your investment will allow us to improve farmer livelihoods and fight climate change.

- **$10 m**
  - Up to 100,000 farmers

- **$5 m**
  - Up to 50,000 farmers

- **$1 m**
  - Up to 10,000 farmers

We have a track record of delivering results, with each project running for 3-5 years. We conduct baseline studies in geographies of interest to efficiently allocate funds to tackle the most immediate challenges in a given context.

SRP Projects offer customized interventions, demonstrating positive impacts on people and planet. Notable outcomes include water use, carbon footprint and chemical input reduction, contributing to increased farm incomes. Additional funding will increase our capacity and scope from farm-level to landscape-level approaches, including biodiversity and gender inclusivity.

Team up with us!

- **Support an on-the-ground project** in a rice producing country to enable smallholder rice farmers to shift to sustainable farming practices. Kickstart or upscale training activities in the field and support entrepreneurs to deliver services that increase farmer profitability, reduce environmental footprint, improve health and food safety, empower women, and build more resilient communities.

- **Launch a high-visibility national, regional, or international advocacy campaign** to scale action with multi-stakeholders. Connect the average consumer to the farmer, secure commitment of retailers to source sustainably cultivated rice for their shelves, featuring high-impact opportunities for innovation, and make the case for policy support.

- **Gain access to data and verifiable metrics** on impacts of interventions for credible public claims aligned with the UN Sustainable Development Goals to highlight your contribution in driving positive impact.

Be part of our journey toward rice sector transformation.
